● **Category of Change**

Category of Change - Assembly Process - Change in Molding

Description of Change: Due to mechanical mold change to XRJF-04A-0-D22-01 have substituted the part with XRJF-04J-0-D22-0A0. Code following the XRJF is the three digit code which represents the number of ports and the mechanical types. 04A is a four port RJ45 connector with Horizontal LED pins and a modular housing design. 04J is a Horizontal LED pins non modular design. The modular design is internal in which the multiple plastic pieces fit together internally to make the housing. The non modular design of the housing of the 04J makes the housing plastic one piece. This change has nothing to do with any visual appearances for dimensions of the product or the footprint of the connector. The change was implemented to improve production of the connector.
