## **USE OF CONFLICT MINERALS STATEMENT**

Xmultiple Technologies is in compliance of the Electronic Industry Citizenship Coalition (EICC) and Global e-Sustainability (GeSi) initiative and Code of Conduct in avoiding the use of conflict minerals which directly or indirectly finance or benefit armed groups in the Democratic Republic of Congo (DRC) or adjoining countries.

This statement confirms Xmultiple Technologies will terminate business with any supplier if we determine the supplier is in any way financing armed groups in the DRC or any other country in this area.

Xmultiple works with our suppliers to determine that Gold, Tantalum, Tungsten or Tin does not originate from the DRC or adjoin countries. Xmultiple works with our suppliers to determine the mining source of the materials they use. Xmultiple relies on EICC/GeSi third party audits of smelters or other sources as part of its program and other programs which comply with the Dodd Franks Act and subsequent SEC requirements.

Xmultiple is the patent holder and inventor of U.S. Patent 4,978,317. XMULTIPLE is assigned to manufacture the patent for RJ modular Jacks with LED indicators (U.S. Patent 4,978,317).

XMULTIPLE is a leading manufacturer of interconnection products sold and marketed worldwide. XMULTIPLE can make assurances to your customers that we will meet the schedule of deliveries of products they order. XMULTIPLE's goals are customer oriented with customer satisfaction as our main focus. Delivering orders on schedule is achieved with the help of our distribution channels.

Very truly yours,

*Alan Pocrass*
