Press Release

Xmultiple Expands Product line of X-SMART™ Connectors Combining More Electrical Connectors with MicroSD Card Capability

Our Patent Pending X-SMART™ Connector is a perfect solution for any MicroSD requirement- Combining is Better

Los Angeles, CA., May 1, 2013 – Xmultiple has increased our product line of X-SMART™ Connectors with several new versions with HDMI, eSATA and Wireless for use on mobile and desktop devices. Connectors now available with MicroSD card feature standard connector options, including LED and bi-polar LED indicators, magnetics and surge protection. to protect against over-voltage or peaks, plus built-in circuit protection and LED indicators.

X-SMART™ connectors conform to industry standard for electrical. Compared with other products on the market, the value of the X-SMART connector is combining MicroSD flash card readers with electronic connectors with saves valuable printed circuit board space. This also improves overall handling, and speed of assembly, while reduce the board space requirements. The X-SMART connector provides better reliability with our optional X-Sealant coating for anti-corrosion.

X-Sealant coating achieves IP67 sealing performance to enable a greater range of application opportunities in rugged environments. The X-SMART connectors are a connector combining multiple connectors with MicroSD flash card capability. MicroSD flash cards are known industry-wide for their performance, compact size, and reliability. MicroSD cards are available in 4GB, 8GB, 16GB, 32GB and 64GB versions. Announcement for the 128GB version has been made by the major manufacturers of MicroSD cards.

About Xmultiple Technologies, Inc.

Xmultiple is a global manufacturer of connectivity products supporting twisted pair wiring communications, networking, RF/Microwave, test & measurement, broadcast, medical, military and industrial applications. Xmultiple manufacturers patent pending and patent electronic products related to all types of interconnector solutions. In addition, our

consumer group has released the XP1-Power iPhone/iPod USB Sync/Charging rechargeable battery and cables which are designed to meet the needs for Smartphone and cellphone users. Xmultiple is an ISO9001:2008 certified company. Xmultiple has implemented the ISO14001:2004 Environment Management System in all our factories and offices worldwide.

Demand for advanced product features, high-speed, convenience, and connectivity is driving the connector manufacturing industry. The industry is forecast to reach an estimated US \$65 billion in 2018 with a CAGR of 4.8% over the next five years (2013-2018). The tablets and desktop computer market is providing growth momentum for connectors, components and flash memory at a high volume level. Connectors are an important electronic component for a mobile phone, and their quality is directly related to the quality and reliability of the mobile phone.

Xmultiple provides interconnect solutions for a wide variety of markets including: data communications, telecommunications, consumer electronics, industrial, automotive, commercial vehicle, aerospace and defense, medical, military, and consumer products. Established in 1999, the company operates 23 manufacturing locations and serves countries worldwide.
