Press Release

New Innovative Mini I/O RJ45 Connector for Any Requirement and Environment

LOS ANGELES, CA, May 28, 2014 – Xmultiple, one of the world’s market leaders in connectivity solutions, announced today a revolutionary new innovative iXP1 RJ45 I/O Mini version series of the standard RJ45 connectors. The iXP1 Series of Mini RJ45 connectors are one of the most compact RJ45 connectors in the industry. The RJ45 Mini I/O connector provides a space-saving wire-termination solution in addition to a more efficient means for connectivity for all industries requiring the use of an RJ45 connector for any environment.

Xmultiple’s Mini I/O RJ45 solution is only one half the size of the conventional RJ45 plug. This product is a new innovation for RJ45 technology which provides space saving and the flexibility to use limited space on the PCB more effectively. The Mini I/O RJ45 is designed with eight contacts and conforms to all the standards of RJ45 connectors. The Mini I/O RJ45 connector is built for the stringent demands of an industrial and high vibration environment. This results in increased productivity with one of the most reliable connectors in the marketplace today. With the Mini I/O RJ45’s innovative size, users have a more efficient means to make their data or industrial connection. With the increase in tablets and mobile devices for the Internet, a smaller and more efficient connector is the best solution for these emerging products.

The key benefits of the Mini I/O RJ45 connector are:

- Convenient small size for emerging tablets and laptops for mobile devices which still require hardwire connectors for improved speed.
- Space saving solution which provides increased design flexibility
- Reliable connections in industrial and vibration-prone environments
- Available in different versions for all requirements and applications
- Available in different configurations (TMT, SMT, right and straight angle)

Mr. Paul Calderone, Product Management: “We are pleased to release a new innovation for RJ connectors with the Mini I/O RJ45 connector range to now available for immediate for new

designs and products being release which require a space saving and reliability to applications where quick and easy connectivity is required.”

About Xmultiple:

Xmultiple, a global manufacturer of connectors and components for the interconnect solution industry. The Xmultiple “Mini I/O RJ45 Connector” represents a new innovative Mini RJ45 connector line of consumer data and mobile products. The Mini I/O RJ45 products and also be enhanced with the integrated of our X-Sealant Anti-corrosion Gel technology. X-Sealant Gel provide consumers with the ability to improve performance and durability. Our X-Sealant Anti-corrosion Gel technology will not only help prevent corrosion, but mitigate against dirt, grime and dust build up. For more information on Mini I/O RJ45 connectors and X-Sealant, please visit www.xmultiple.com
